Letter Of Recommendation

To Whom It May Concern,

I am pleased to offer my strong recommendation for Onur Arıkan, who worked as a Software Developer at MRC Türkiye under my supervision from February 2024 to September 2024.

During his time with us, Onur made substantial contributions to our team, particularly in the development of software for Spatial Load Forecasting (SLF) using C# and WinForms. He played a key role in implementing verification algorithms that ensured the accuracy and consistency of our data, and he was instrumental in devising imputation strategies to manage missing data within SLF models. Additionally, Onur developed Python-based software that analysed yearly benchmark data from leading electricity distribution companies, producing detailed reports on key performance indicators (KPIs). His technical expertise and problem-solving skills were vital to the success of several projects during his tenure.

Beyond his technical abilities, Onur consistently brought a positive and collaborative spirit to the workplace. His strong interpersonal and communication skills made him a valued team member, and he was always willing to contribute both technically and in fostering a supportive work environment. His attention to detail and ability to deliver precise and reliable solutions were consistently impressive.

Given his outstanding performance and the significant impact he had on our team at MRC Türkiye, I wholeheartedly recommend Onur Arıkan for any future employment opportunities. He would be an asset to any organization, and I am confident that he will continue to excel in his professional endeavours.

If you require any further information, please feel free to contact me.

Yours sincerely,

Gökhan TOSUN

Director - Technology and Smart Infrastructure
